Re: Gay Company Limited

We were the Architects and Prime Consultants for the **Courtice Fire Station & Community Policing Centre** located on Trulls road in Courtice, Ontario. Through a Public Tendering procedure, Gay Company Limited became the General Contractor for the Project.

The building consisted of 10,000 Square Feet of New Construction on one level. Approximately 8,500 Square Feet is Fire Station and the balance serves the Durham Regional Police Services' requirements. The form of construction is a combination of load-bearing masonry and wood frame construction with brick cladding and a prefinished metal roof.

We found Gay Company Limited to be very professional and dilligent in their work throughout the Construction process. Their site Personnel were very capable and were able to ensure a high quality of workmanship from all trades. The Project moved smoothly from start to finish in accordance with the Construction Schedule.

We would not hesitate to recommend Gay Company Limited for future projects and we would be very pleased to work with them again.

Yours very truly,

Paul McIntosh
